```java
// Κλάση
public class Reservation {

        protected int days;

        public Reservation(int days) {
                this.days = days;
        }

        public double calculateCost() {

                return days*120;
        }

}
```
