```java
public class BankAccount implements Measurable {

    private double balance;

    // Κατασκευαστής
    public BankAccount(double balance) {
        this.balance = balance;
    }

    //Αλλάζω το getBalance σε getMeasure
    public double getMeasure() {
        return balance;
    }

}
```
